

PROJECT COMMAND CENTER

– ADVISER HANDOFF

Obsidian second-brain read | Samuel Sanchez | Last updated: August 12, 2026

HOW TO USE THIS SHEET

For each **active** project: inferred end goal, where you are, open work, and a **paste-ready jump-back-in prompt**. Also includes this week's **Top 5 tools** from the Facebook Saves extract, mapped to live projects. Full markdown: `00_Project_Command_Center.md` · Top 5 note under Imported AI Clippings.

ACTIVE PROJECTS (BY HEAT)

 Sanchez Auto

 CDL PRAC one

 img2threejs

 GIRLS gone digital

 CarViews

 Saucer Siege

 Alamo Car Parts

 UI Dashboard X

HEADLINE LEVERS THIS WEEK

- 1) Sanchez production polish (hottest product commits Aug 7-8).
- 2) CDL non-code ship blockers (icon, Privacy, ASC Game Center, device QA).
- 3) Dashboard git dirty + behind origin – reconcile before packaging with Pake.

T5 TOP 5 TOOLS THIS WEEK

from FB Saves · 2026-08-12

- 1. **Claude-Mem** – persistent agent memory across CDL / Sanchez / CarViews sessions. Install/verify first.
- 2. **skills.sh** – install ≤3 skills for ship + frontend + video; maintain a personal allowlist.
- 3. **Anime.js** – one hero/CTA motion beat on Sanchez homepage redesign.
- 4. **Understand Anything** – knowledge graph Alamo or Dashboard before deep re-entry.
- 5. **Pake** – dock-native shell for Samuel X Dashboard after git is green.

4T 4-TOOL ACTIVATION (PROJECT-TIED)

vault-routine close

TOOL	PROJECT	CONCRETE MOVE
Claude-Mem	Multi-project	Keep CDL ASC + CarViews identity decisions warm across sessions
Anime.js	Sanchez Auto	One hero/CTA motion beat so the Aug redesign feels finished
Understand Anything	Alamo	Graph SwiftUI tree before 90% accuracy validation
Pake	Dashboard X	Package live dashboard as dock app once deploy is trusted

🎯 **End goal:** **Shop site that converts** – book / drop-off / directions, maintainable.

📌 **Now:** Network-style homepage + booking CTAs + condensed drop-off scheduler (`b269fb8` , clean `main`).

🍷 **Open:** Mobile smoke, SEO/NAP, optional Anime.js motion.

📖 JUMP-BACK-IN PROMPT

Project: Sanchez Auto LLC (~dev/CLAUDE WORLD/08 sanchez-auto-llc, main). Goal: production polish after Network-style redesign.
Context: Homepage redesign + schedule/calendar booking + directions + condensed drop-off scheduler shipped (b269fb8). Tree clean.
Do: (1) smoke CTA→booking→directions on mobile; (2) SEO title/description/NAP gaps; (3) optional one Anime.js hero/CTA beat without hurting LCP. Commit polish; don't push unless I say so.

🎯 **End goal:** **Ship CDL Class A study app** to App Store; pass Review first try.

📌 **Now:** Feature-complete v1; quiz audio off main thread + icon/prose polish. Non-code ship blockers remain.

SHIP BLOCKERS

Truck app icon · Privacy/Terms + ASC URL · Game Center + `cdl_total_xp` · device QA · strip DEBUG hooks.

📖 JUMP-BACK-IN PROMPT

Project: CDL PRAC one (~dev/CLAUDE WORLD/10 CDL PRAC one, branch samuel0010). Goal: non-code ship blockers toward App Review.
Context: v1 feature-complete; latest: quiz audio off main thread. Vault: 01_Tasks.md.
Do: (1) 1024² truck AppIcon; (2) Privacy/Terms draft + ASC steps for Privacy URL + GC + `cdl_total_xp`; (3) device-QA checklist; (4) list DEBUG hooks to strip. Commit only approved code/docs; don't push unless I say so.

🎯 **End goal:** **Reliable image→Three.js / character+materials pipeline** for car/game/client work.

📌 **Now:** Character track + material pipeline + working release path (`d667338`).

🍷 **Open:** Dogfood one real asset; log recipe in Visual 3D Lab usage log.

🎯 **End goal:** **Shop/brand site that sells** and deploys clean on Vercel.

DIRTY TREE

~25 dirty files including deleted shop-carousel assets – resolve before next deploy.

- 🎯 **End goal:** Phone + CarPlay private video player; unify with YTOS27 identity/playback.
- 📍 **Now:** Library/Watch/Settings + custom CarPlay + share/PiP/ambient shipped. Clean `main`.
- 🕒 **Open:** Entitlement identity · PlaybackManager port · YouTube-on-CarPlay decision.

📄

JUMP-BACK-IN PROMPT

Project: CarViews (/Users/samuel/dev/CarViews). Goal: Phase C consolidation with YTOS27.
Context: UI + CarPlay surface shipped; YTOS27 holds PlaybackManager. Vault Progress – 2026–07–22.
Do: (1) entitlement pros/cons carviews vs ytos27; (2) map PlaybackManager + handoff port plan; (3) YouTube-on-CarPlay port vs cut + README draft. Commit only if I ask.

06

 SAUCER SIEGE

M5 done · M6 doorstep

- 🎯 **End goal:** Reskinnable 3D web arcade → mobile (Capacitor, IAP, art/name lock).
- 📍 **Now:** M0–M5 complete historically; clean tree; not on GitHub yet.
- 🕒 **Open:** M6 Capacitor + art/name + IAP; push repo.

07

 ALAMO CAR PARTS

quiesced 2026-07-13

- 🎯 **End goal:** F30 AR part ID + RockAuto referral sales (≥90% component accuracy).
- 📍 **Now:** Full v1 scaffold; demo mode; under `~/dev/CLAUDE WORLD/13 Alamo Car Parts`.
- 🕒 **Open:** Real accuracy tests; RealOEM pipeline; Keychain API path; vault index.

08

 UI DASHBOARD X

behind origin · dirty

- 🎯 **End goal:** Zone dashboard live + Daily Brief reliable on Vercel.

GIT RISK

`main` behind origin by 1; ~11 dirty local files. Reconcile before push or Pake packaging.

-

DORMANT (DETECTED, NOT EXPANDED)

PROJECT	NOTE
XJournal + Model G	No recent git heat
LLM Builder Local	Corpus support for Model G
AP Connect	ASC screenshot app
YTOS27 / RuView / Polymarket / Tesla Heat Map	Quiet / index-only
